

Enhancing Dubai's Livability and Tourism through Traffic Flow and Centralized Services

[Assem Hijazi – Experience, Knowledge & Ideas](#)

I'd like to suggest some ideas to help make Dubai even better for both residents and visitors. By relocating key services—like consulates, government offices, and exhibition centers—to areas outside the city center, we can reduce traffic, make better use of space, and create a smoother experience overall.

Moving these services to strategic areas, such as the Expo Area or near Maktoum Airport, would ease congestion and make Dubai more accessible and enjoyable. This approach would support Dubai's vision for growth and help create a city that's even more livable and welcoming.

Main Goal

To create a more accessible, attractive Dubai that offers a better quality of life for residents and a top-tier experience for tourists.

Key Objectives

1. **Optimize Urban Space:** Increase the availability of open spaces within Dubai.
2. **Reduce Traffic Congestion:** Minimize daily traffic in central areas, especially during peak hours.
3. **Centralize Key Services:** Relocate essential services to dedicated areas for ease of access.
4. **Enhance Tourism Appeal:** Build a more streamlined and tourist-friendly city.
5. **Efficient Use of Space:** Ensure optimal utilization of available spaces in Dubai.
6. **Facilitate Government Services:** Simplify access to government and consular services.

Strategic Initiatives

Consulates

- Objective: Relocate all consulates to a centralized, accessible area.
- **Suggested Location:** Expo Area, strategically positioned near Dubai International Airport.
- **Benefits:** Reduces traffic in central Dubai, especially during morning hours. Enables direct access from other emirates, bypassing high-traffic zones.

Government Offices

- **Objective:** Move core government offices, including the Police Headquarters, Dubai Courts, and Immigration Offices, to alleviate city-center congestion.
- **Suggested Location:** Expo Area.
- **Benefits:** Allows access from multiple roadways outside central Dubai, reducing traffic throughout the day.

Ministerial Offices

- **Objective:** Centralize ministerial offices in a dedicated area.
- **Suggested Location:** Expo Dubai, with a designated space for ministers' offices.
- **Benefits:** Streamlines administrative access while decreasing daily traffic in the heart of Dubai.

Exhibition Centers

- **Objective:** Establish a new location for exhibition centers outside central Dubai.
- **Suggested Location:** Near Maktoum Airport.
- **Benefits:** Simplifies logistics for events and reduces the burden on central traffic. Proximity to the airport supports easier freight and transport services.

Banks Headquarters

- **Objective:** Relocate bank headquarters to improve space utilization and accessibility.
- **Suggested Location:** Expo Area.
- **Benefits:** A centralized banking hub reduces congestion and fosters a more efficient business environment.

Logistics Centers and Warehouses

- **Objective:** Move logistics hubs and warehouses to a dedicated industrial zone outside central Dubai.
- **Suggested Location:** Industrial area near Maktoum Airport.
- **Benefits:** Eases the movement of goods and services and reduces traffic and industrial activity in central Dubai.

Additional Facilities

- **Objective:** Relocate any other essential facilities as needed to create a balanced urban environment in Dubai.
